Master of Multidisciplinary Research in Experimental Sciences

Ceremony Programme

September 12, 2018 - Catalunya La Pedrera

| | | |
|-----------------|----------------------------------|--|
| 17:00 h. | Welcome | Lluís Farrés (Director Coneixement i Recerca, Fundació Catalunya La Pedrera) Robert Sewell (Director MMRES, ICFO) |
| 17:15 h. | Keynote speech | Elisabet Romero (Group Leader, ICIQ) |
| 17:45 h. | Recognition of 2018 class | Rubén Vicente (Coordinator MMRES, DCEXS) Núria Bayó (Coordinator MMRES, BIST) Alumni |
| 18:00 h. | Closing remarks | Gabby Silberman (Director General, BIST) |
| 18:10 h. | Cocktail & networking | |

The **Master of Multidisciplinary Research in Experimental Sciences** is a pioneering programme focused on hands-on research at scientific centres of excellence in Barcelona. It is a joint academic programme of the Department of Experimental and Health Sciences of Pompeu Fabra University (DCEXS-UPF) and the Barcelona Institute of Science and Technology (BIST). It offers highly flexible and personalized hands-on research training in a multidisciplinary research environment. It also develops talented scientists through experiential training in professional skills such as scientific communication, project management, responsible research, and innovation.

“The Master of Multidisciplinary Research in Experimental Sciences brings together the BIST community in a novel way, drawing from its multidisciplinary to create a unique opportunity for students to work in this world-class environment.”

Andreu Mas-Colell, BIST President

“The Master is a joint effort by the BIST centres and the UPF. Aimed at working on the most cutting-edge educational innovations and research skills, it opens the doors to a myriad of future scientific challenges.”

David Comas, Director of the Department of Experimental and Health Sciences, UPF

“The Master aims to give talented students the opportunity to launch their scientific career through intensive, in-depth research training in outstanding laboratories, an innovative and tightly-integrated training, and the chance to interact with, learn from, and be inspired by leading local and international scientists.”

Roderic Guigó and Robert Sewell,
Directors of the Master
